

Payments Policy

Daraz Knowledge Base — Customer Support Reference Document

Accepted Payment Methods

- Cash on Delivery (COD)
- Credit/Debit Card (Visa, Mastercard)
- Bank Transfer / Online Banking
- Digital Wallets (e.g., Daraz Wallet, EasyPaisa, JazzCash)
- Installment plans (where available, via partner banks)

Payment Security

All online transactions are processed through PCI-DSS compliant, encrypted payment gateways. Card details are never stored directly on the platform's servers. Customers are advised not to share OTPs or payment PINs with anyone, including anyone claiming to be Daraz staff.

Cash on Delivery (COD)

- Available for most categories, subject to order value limits.
- Exact change is recommended; some couriers may not carry change.
- COD availability may be restricted in certain high-risk or remote areas.

Failed or Duplicate Payments

If a payment fails but the amount is deducted, it is usually auto-reversed by the bank within 3-7 business days. Duplicate charges should be reported to Customer Support with transaction proof for verification and reversal.

Daraz Wallet

The Wallet allows customers to store refunds and cashback for faster future checkouts. Wallet balance can typically be used for purchases but may have restrictions on withdrawal depending on regional regulations.
